Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-12 provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3, 11, 12 and 28 of copending Application No. 10/022580. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the current application are broader in scope than the copending application. The copending application recites four force detecting elements and four switching elements, while the current application first recites an apparatus with one force detecting element and one switching element and secondly recites an apparatus

Art Unit: 2858

with two force detecting elements and two switching elements. It would have been obvious to one skilled in the art at the time of the invention to use less force detecting elements and less switching elements for the purpose of providing a less complex force detector.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
